

Producing consistent, high-quality marketing material is easy... ...when it's **automated.**

Did you know that White Oak's OMS (Online Management Solutions) technology automates three major marketing concerns: branding, time to market, and efficiency?

Think about how much time you would save each day if those concerns were handled automatically while you focus your attention on more pressing matters. Take a look at a simple business card. The average business card order takes about 40 minutes to order (requisition, order, proof, changes, approval). The time saved by automating with an OMS adds up quickly. An OMS system can process the order in less than 10 minutes.

Check out the math below. How much more revenue do you think you could generate with an extra 120 hours per year?

30 minutes x
5-day work week
= 2.5 hours of
uptime a week

2.5 hours a week
x 4 weeks per
month = 10 hours
of uptime a month

10 hours a month
x 12 months
= 120 hours of
uptime a year
